Ligaplex® II is Mainly Comprised of Manganese Glycerophosphate, Carbamide, Veal Bone PMG™ Extract, Bovine Heart PMG™ Extract, Wheat Germ, and Bovine Liver

Organ tissue proteins have been widely used to support good health since the time of the ancient Greeks. Liver powder may stimulate, support, and maintain protein metabolism. Carbamide stimulates osmotic transfer of body fluids, helping to reduce swelling, and also aids protein metabolism. Calcium is needed for repair of connective tissue. Manganese is an important trace mineral for skeletal and connective tissue development. Vitamin E is a powerful antioxidant that protects the joints from damage by free radicals and increases joint mobility. One of the richest sources of the complete vitamin E complex is found in wheat germ oil. Coenzyme Q10 increases tissue oxygenation to aid in repair of connective tissues. This important nutrient can be found naturally in bovine heart tissue. The combination of these ingredients contributes to the overall functioning and well-being of the skeletal system through a number of physiological processes.†

How Ligaplex II Keeps You Healthy

Helps maintain a healthy skeletal system

Bovine bone and veal bone PMG™ extract is used to stimulate healing of connective tissue. Calcium is the most important element required for the body to maintain strong bones and teeth and to trigger a number of other important physiological processes. Calcium lactate is a highly bioavailable and useful form of this important element, since it converts to calcium bicarbonate in one chemical step. It is the calcium ‘form of choice’ for many calcium therapies. Manganese is a trace mineral essential for the proper formation and maintenance of bone, cartilage, and connective tissues. Its properties for connective tissue formation aid in maintenance of articulating surfaces. Manganese, an antioxidant, cooperates with many different enzymes, helping to carry out different metabolic processes, including energy production and protein metabolism.†

Enhances metabolic efficiency

Liver provides nutrients, enzymes, hormone precursors, and a number of other factors that help support specific cellular metabolism and physiological functions. The proteins found in the liver are used not only for a rich source of nutrients, but they also provide a nutritional stimulus to corresponding human organs. Carbamide stimulates proper tissue fluid metabolism. The maintenance of proper fluid levels in the interstitial spaces of tissues surrounding a joint helps keep the joints healthy.†

Maintains cellular health

Protomorphogen™ is the brand name of Standard Process' extracts derived from nucleoprotein-mineral molecules. These molecules are the singular units of the cellular blueprint assembly. The primary organizers of protein specificity, these cellular determinants are concentrated components of cell chromosomes. Veal bone Protomorphogen™ extract serves a myriad of functions beyond providing shape and support for the body. The antigenic properties of these nucleoprotein-mineral molecules promote healthy cellular division, growth, repair, and function.†
What Makes Ligaplex II Unique

Unique Product Attributes

Multiple nutrients from a variety of plant and animal sources
- Provides support to tissues and joints involved in strenuous repetitive activity
- Bovine bone and veal bone PMG™ extract is used to stimulate healing of connective tissue
- Extracts from bovine and ovine tissues provide nutrients and support to the corresponding tissues in humans
- Vitamins, minerals, and nutrients from plants and animal tissues work synergistically for maximum effect†

Contains Protoporphogen™ extracts
- Standard Process’ unique manufacturing method of deriving tissue cell determinants from animal glands and organs
- Help provide cellular support and rehabilitation in corresponding human tissues
- Important antigenic properties of nucleoprotein-mineral determinants, the foundation of the product†

The calcium lactate in Ligaplex II is a pure-vegetable source of calcium
- Not derived from a dairy source

Certified Organic Farming

A healthy ecosystem is created by using organic farming techniques, such as rotating crops, fertilizing the soil with nutrient-rich cover crops and by-products from our processing, practicing strict weed control standards, and continually monitoring the health of our plants
- Assures the soil is laden with minerals and nutrients
- Ensures plants are nutritionally complete and free from synthetic pesticides

Unique Processing

Upon harvesting, nutrient-rich plants are immediately washed and promptly processed
- Preserves nutritional integrity

Exclusive low-temperature, high-vacuum drying technique
- Preserves the enzymatic vitality and nutritional potential of ingredients

Not disassociated into isolated components
- The nutrients in Ligaplex II are processed to remain intact, complete nutritional compounds

Degreed microbiologists and chemists in our on-site laboratories constantly conduct bacterial and analytical tests on raw materials, product batches, and finished products
- Ensures consistent quality and safety

Vitamin and mineral analyses validate product content and specifications
- Assures high-quality essential nutrients are delivered

Whole Food Philosophy

Dr. Lee challenged common scientific beliefs by choosing a holistic approach of providing nutrients through whole foods. His goal was to provide nutrients as they are found in nature—in a whole food state where he believed their natural potency and efficacy would be realized. Dr. Lee believed that when nutrients remain intact and are not split from their natural associated synergists—known and unknown—bioactivity is markedly enhanced over synthetic nutrients. Following this philosophy, even a small amount of a whole food concentrate will offer enhanced nutritional support, compared to a synthetic or fractionated vitamin. Therefore, one should examine the source of nutrients rather than looking at the quantities of individual nutrients on product labels.

Two capsules supply 220 mg manganese glycerophosphate, 1.15 mg carnosine, 65 mg veal bone PMG™ extract, and 40 mg bovine liver.

Proprietary Blend: Nutritional yeast, carnosine, bovine bone, veal bone PMG™ extract, bovine liver, defatted wheat (germ), bovine heart PMG™ extract, magnesium citrate, oat flour, inositol, carrot (root), dried pea (vine) juice, Tillandsia usenoides, ribose-5-phosphate, beet (root), bovine spleen, ovine spleen, bovine adrenal Cytoes™ extract, bovine kidney, mushroom, bovine liver fat extract, flaxseed oil extract, potassium para-aminobenzoate, rice (bran), and soybean lecithin

Other Ingredients: Manganese glycerophosphate, gelatin, calcium lactate, water, calcium stearate, colors, mixed tocopherols (soy), ascorbic acid, vitamin A palmitate, cellulose, cyanocobalamin and cholecalciferol.

Suggested Use: Two capsules per meal, or as directed.

Sold to health care professionals.
